Bourns® Model SRF1260A and SRF1280A Series Dual-Winding Shielded Power Inductors

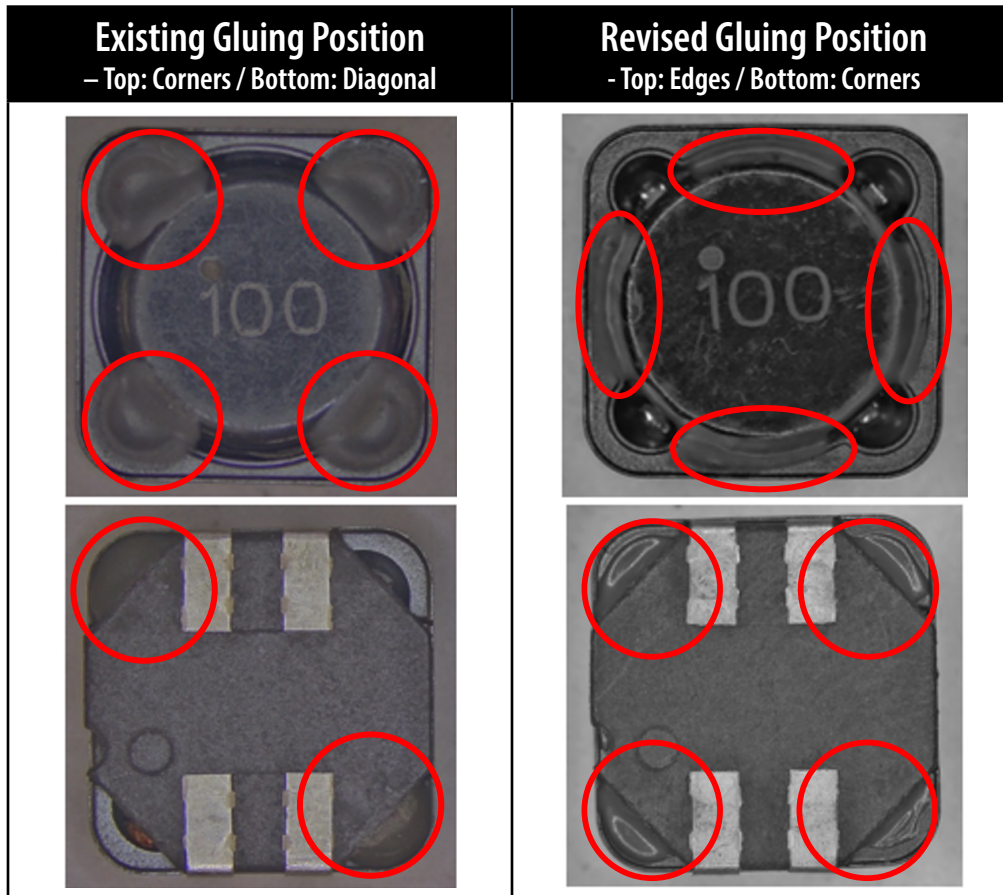

Gluing Process Changes

Riverside, California – June 17, 2024 – In the spirit of continuous improvement, effective February 28, 2025, Bourns will change the gluing process from a manual to an automated process for the Model [SRF1260A](#) and [SRF1280A](#) Series Dual-Winding Shielded Power Inductors. Additionally, the type of glue and its application position will be changed to enhance durability. A list of affected part numbers is included below.

As shown in the images above, the form of the affected part numbers will change slightly due to the change in gluing position. The fit and function of the affected inductors will remain the same. The quality and reliability of the affected inductors should be improved as a result of the changes. Traceability will be maintained through lot code and date code.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

- Date that deliveries of product manufactured with the current gluing process will cease: **February 27, 2025**
- Date that deliveries of products manufactured with the new gluing process will begin: **February 28, 2025**
- First date code using the above changes: **2509**
