

Description

This open top antistatic bubble bag is manufactured from low-density polyethylene film modified to be antistatic and pink. The air bubbles in the material cushion shock and vibration. The bag has various uses in ESD protected areas:

- To contain non ESD sensitive items
- Separation of ESD sensitive and non sensitive items
- To offer physical protection to finished goods
- Transfer non ESD sensitive items from the EPA for primary packaging

Bags are supplied unprinted, not labelled and loose (not bundled).
