Dynamic D-3000 Series Connector

General Description of Changes

TE has adopted an absolute goal of 30% CO2 reduction by 2032. Dedicated to our commitment to sustainable development. We participate in various initiatives , and use our creativity skills to help advancing our sustainability. Palladium(PdNi) with gold flash plating are emerging as sustainable alternatives to gold plating. These materials offer comparable electrical conductivity and corrosion resistance, making them suitable for many applications. Additionally, they significantly have a lower environmental impact ,due to reducing CO2 footprint of plating. Coming up with this solution,we are glad to finally clarify the implementation of PdNi. We will replace gold plating with PdNi+Gold Flash on the exiting D3000 233 part numbers As an additional supplement. we also announce the cancellation of the previous PCN-24-215743. At the same time, There are a few part numbers as a Local for local strategy to produce in Japan to serve Japanese customers, we will carry out the implementation of PdNi in the second stage. For gold plating:1. Last time buy date is 27th June 2025; 2. Last shipment date is 26th September 2025.
