

Technical Data Sheet

Cat-5E Splitter

Cat-5E splitters enable 2 different devices to share the same cable and outlet. They are usually used in pairs, one at the outlet and one at the [patch panel](#). Narrow design is ideal for high-density patch panels because the two sockets are mounted vertically to avoid blocking neighbouring sockets. Several standard wiring variants are available. Colour is white. A [Data/Data Splitter](#) with a short (100mm) cord is also available.

Cat #	Wiring #	Type
P2332	2	Voice + Voice
P2334	4	Data + Data
P2335	5	Voice + Voice
P2336	6	Data + Voice
P2337	7	Parallel
